## Course Modules:

### 1. Introduction to Basics of Photography

Learn the fundamentals of photography, including camera settings, composition, and exposure. Perfect for beginners to build a strong foundation.

### 2. Night Photography

Master low-light techniques, including long exposure and creative use of artificial light, to capture stunning nightscapes and cityscapes.

### 3. Photo Editing

Get introduced to essential editing software and learn basic photo enhancement techniques to bring your images to life.

4. **Street Photography**

Explore the art of storytelling through candid shots. This morning session focuses on capturing the energy and essence of urban life with optimal lighting.

5. **Studio Portrait Photography**

Dive into indoor lighting techniques, posing, and composition to create professional-quality portraits in a controlled environment.

6. **Outdoor Portrait Photography**

Learn to use natural light effectively for outdoor portraits. This morning session emphasizes working with golden hour lighting for stunning results.

7. **Hands-On Editing Session**

Apply your editing skills in a practical workshop, focusing on advanced techniques to refine and perfect your photos.

8. **Summary Session (Online)**

Wrap up the workshop with a review of key concepts, Q&A, and personalized feedback to help you continue your photography journey.
